

Easier, Faster, More Intuitive

Now it's even easier to use DocuSign for Salesforce! We've simplified the DocuSign experience in Salesforce, keeping the same great features you love, but improved. In DocuSign for Salesforce 6.0, we have redesigned the user interface and made it easier to install and configure your account.

Easier Sending Experience

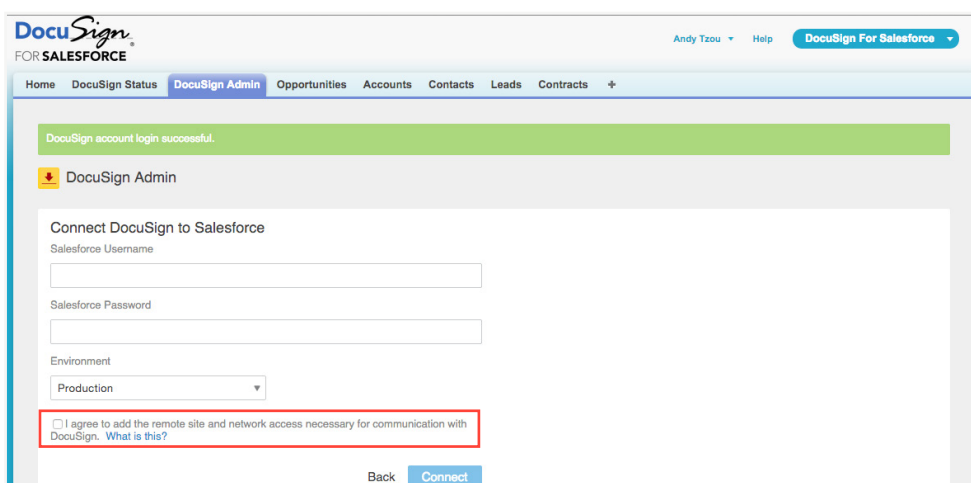

The Sending page is now more visually intuitive and has new time saving features:

- Drag-and-drop documents and recipients to reorder (or quickly delete by clicking on "x")
- Quick Add recipients — now it takes just seconds to add a new recipient, even if they are not already in Salesforce as a Contact, with the "Quick Add" dropdown button.

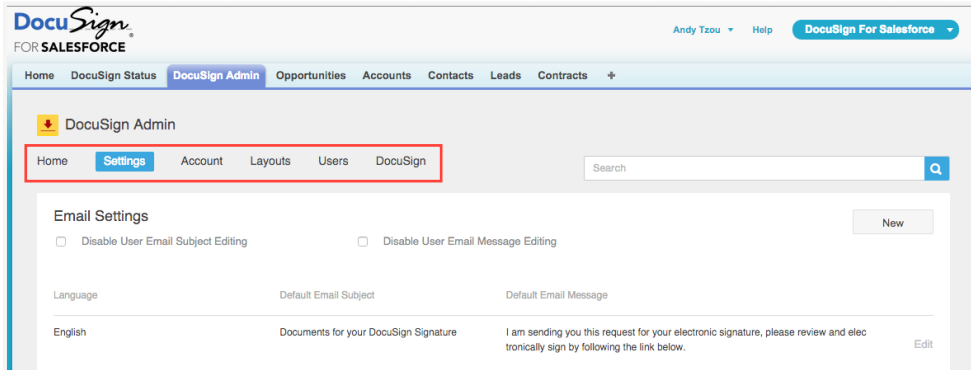

Easier and Faster Installation

It's now easier to get set up with a DocuSign for Salesforce account. The installation process takes fewer steps, saving you valuable time. Rather than accepting each IP address range, you can accept all network access with one simple checkbox.

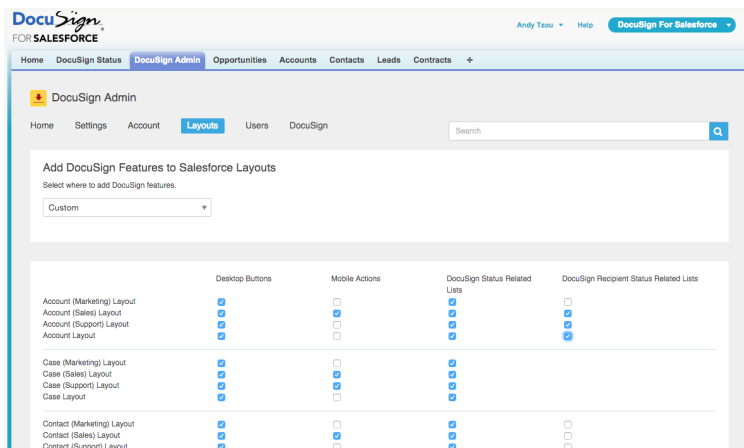

Easier and Faster Account Configuration

The Admin section is now more visual and easier to navigate with tabs for settings, accounts, layouts, and users.

Save time with the new Layouts page — where you can manage the settings for all of your page layouts in fewer steps. Now you can add (or remove) the Send with DocuSign button to multiple layouts in seconds — from a single page.

Start using the new DocuSign for Salesforce today!

How to Get Started

Download DocuSign for Salesforce 6.0 from the [AppExchange](#), Email dfs@docusign.com, or contact your DocuSign Sales Rep.

Note: DocuSign for Salesforce 6.0 is currently available in English only.
